## COMMITTEES AND WORKING GROUPS

### COMMITTEE ON THE INFORMATION SOCIETY (CIS)

Conclusions of the Committee meeting  
10<sup>th</sup> of November 2009 in Guangzhou, China

### CIRCULAR 11

Dear members of the Committee,

On **Tuesday, 10th of November 2009** took place in Guangzhou (China), on the occasion of the Executive Bureau and World Council meetings of UCLG, the **annual meeting of the Committee on the Information Society**.

The meeting was chaired, as it was informed by **Ms. Ibone Bengoetxea, Deputy Mayor of the City of Bilbao** in representation of the Presidency of the CIS and counted on with the active participation of **FLACMA, Guangzhou City, Taipei City, the CNM and UCLG's World Secretariat**, among others.

The meeting represented an opportunity to make a balance on the **activities developed by the Committee in 2009**, to inform the members about the **next activities and events** and to **exchange knowledge and experiences** between the members.

We also inform you that as it was advanced in previous communications, during the meeting it was made a **general reflection between the members, on the current situation of the Committee**. From the Presidency, it was proposed that besides continuing with the work developed until now of sharing the digital development with other cities and regions that far away from reaching that objective, **to give the Committee a wider scope**, based on the seek of the competitive excellence of the local governments through knowledge management and innovation in the cities and municipalities.

In this line and to respond to this new focus, it was approved by the Committee members that attended the meeting and subsequently by the UCLG World Council, to change the name of the Committee to **"Committee of Digital and Knowledge-based Cities"**. A new name responds to the new objectives established and that goes in line with the work to be developed by the Committee from now on.
